

JAE H KIM

kjh9643@gmail.com • (510) 566 0708 • <https://jaeh-kim.com>

Software Engineer specializing in AI-powered automation and scalable backend systems. Experienced building full-stack applications with Python, FastAPI, React, React Native, AWS, and data pipelines that deliver measurable business impact. Skilled in integrating AI technologies such as OpenAI, Gemini, and ML models to build end-to-end products, automate workflows, and streamline operations in cross-functional agile environments.

EDUCATION

University of California, Irvine — B.S. Computer Science

Graduated Dec 2021

WORK EXPERIENCE

Tri Pointe Homes

Irvine, CA

Software Developer

Oct 2021 - Nov 2024

- Designed and implemented an ML model based classification pipeline for 200K+ support tickets (84% accuracy), saving 3,000+ manual hours
- Built webhook-driven integrations across internal ERP APIs, Freshservice APIs, and PyAD to automate employee onboarding and offboarding workflows, reducing processing time from 3 days to 2 hours
- Engineered Apache Airflow-scheduled integrations for DocuSign and Laserfiche, automating ticket entry cutting manual effort by 90 %
- Built an OCR automation with Python, Tesseract, and API integrations (internal ERP, DocuSign) to process standardized sales PDFs, reducing manual workload by 70% and increasing data accuracy
- Designed and automated ETL pipelines in Python processing 1M+ records, orchestrated with Apache Airflow to ensure fault-tolerant, repeatable workflows

Developer Intern

May 2021 - Sep 2021

- Automated ERP data uploads via SQL scripts, reducing processing time by 99%
- Processed and normalized 400K+ user records using Python and pandas to improve reporting accuracy

PROJECTS

MockTerview - Voice-Based AI Interview Agent

- Built a Voice-Based AI Interview Agent using React, FastAPI, PostgreSQL, Docker, WebSocket, and Gemini Realtime API to conduct real-time mock interviews tailored to a user's resume and target job description
- Implemented low-latency AI voice interaction with adaptive follow-up questions, dynamic difficulty adjustment, timed responses, transcript generation, and role-specific feedback

Bet You Can/MuskMaker - AI Accountability/Tracking App

- Built and shipped a full-stack goal-tracking platform using FastAPI and React Native, with JWT authentication, Google Sign-In, Stripe payments, and AWS-backed verification workflows
- Designed stateless, horizontally scalable backend infrastructure using PostgreSQL-backed refresh tokens, Redis rate limiting, Celery/RabbitMQ asynchronous processing, Celery Beat scheduling, and AWS EC2, RDS, and Redis
- Implemented end-to-end payment, payout, and verification workflows using Stripe ledger flows, S3 file storage, SES email, AI-powered photo verification, personalized notifications, and automated cleanup and fund-distribution jobs

KSSN Redactor- Serverless PDF text redact program

- Developed a serverless OCR-based redaction system using AWS Lambda, Tesseract, and S3 to automatically detect and redact Korean Social Security Numbers from uploaded PDFs
- Configured and managed DNS records (SPF, DKIM, and DMARC) for a custom domain to enable authenticated email delivery through AWS Simple Email Service (SES), ensuring high deliverability and domain reputation

SKILLS & EXPERTISE

Languages: Python, Java, JavaScript/TypeScript, SQL

Cloud & DevOps: AWS (Lambda, EC2, S3, RDS, SES, Route 53, IAM), Docker, CI/CD pipelines, Apache Airflow

Frameworks & Tools: FastAPI (RESTful APIs), React / React Native, Scikit-learn, pandas, NumPy, SQLAlchemy, SpringBoot

Other: Microservices Architecture & RESTful APIs, Agile methodologies, AI/ML integration (OpenAI, Gemini, classification models), relational databases, data pipelines & ETL

Certificates: AWS Certified Solutions Architect - Associate, AWS Certified Developer - Associate
